

Regnar

March 2015

Regnar is the first subsea completion in the Danish Sector. The field has been developed by Mærsk Olie og Gas AS using a single satellite tree tied back to the Dan FA platform.

LICENGINEERING A/S has worked on the project from concept engineering through commissioning.

The well was successfully brought on-stream in September 1993.

The scope of work comprised:

- Appraisal of the initial concept.
- Detailed design of protection structure, pipeline tie-in, and risers.
- Interface engineering with the tree and completion.
- Ad-hoc consultancy on various aspect of the system.
- Integration testing.
- Offshore installation supervision.
